

Old Church Refurbishment starts

On Monday, 19th July, 2010, the Old Church looked quite it normally looks during the course of our working week. A major refurbishment will attempt to cure the cause of the dampness in our walls which has created unpleasant scars to the plasterwork. The walls will be treated and new plaster rendered. The rain water goods, like gutters and downspouts will also be repaired or renewed. There are a lot of other jobs to be done too.

The work will take 4 weeks and be completed in time for the wedding on Saturday 14th August. Then, in September, there will be a further closure while the walls are redecorated. Exciting and expensive times!
